PROFESSIONAL SUMMARY

Full Stack Developer with 2 years of experience building scalable web and mobile applications across food delivery, solar clean-tech, and aviation telecom platforms. Proficient in React.js, React Native, TypeScript, Node.js, Express.js, MongoDB, MySQL, Redis, BullMQ, and AWS. Experienced in designing REST APIs, real-time backend workflows, queue-based processing, and automated monitoring tools for production systems.

TECHNICAL SKILLS

Frontend: React.js, React Native, TypeScript, JavaScript (ES6+), Redux Toolkit (RTK), Tailwind CSS, HTML5, CSS3, Responsive Design

Backend: Node.js, Express.js, Spring Boot, Flask, RESTful APIs, BullMQ, Message Queues

Databases: MongoDB, MySQL, SQL, NoSQL, Redis, Query Optimization, Indexing

Cloud & DevOps: AWS, CI/CD, Linux, Shell Scripting, Git

Languages: JavaScript, TypeScript, Python, Java, C

Tools & Practices: Jira, Zoho, Agile, Figma-to-code, Git

PROFESSIONAL EXPERIENCE

Software Engineer | Easy Caters India | Vadodara, India **May 2026 – Present**

- Design and optimize scalable REST APIs using Express.js and MySQL for high-volume data processing.
- Deploy backend applications on AWS to ensure high availability across environments.
- Develop responsive React user interface components and integrate them with backend logic.
- Optimize complex SQL queries and database indexing to improve application performance and reduce latency.

Full Stack Developer | Frelit Energy | Vadodara, India **Jun 2025 – May 2026**

- Developed and maintained scalable web and mobile applications using React.js, React Native, TypeScript, Redux Toolkit, and Tailwind CSS.
- Designed, implemented, and maintained RESTful APIs using Express.js and MongoDB for production systems.
- Implemented Redux Toolkit state management for predictable data flow across web and mobile platforms.
- Built responsive, mobile-first user interfaces optimized for desktop and Android applications.

Application Support Engineer | Phonon.io | Vadodara, India **Oct 2024 – Jun 2025**

- Developed Python (Flask) backend automations with React frontend integration for internal monitoring tools.
- Executed SQL and NoSQL queries for failure analysis and system health monitoring, reducing incident resolution time by 20%.
- Automated recurring backend processes using Linux shell scripting.
- Partnered with telecom clients to resolve real-time issues across SMS, email, and voice platforms while maintaining 99% uptime.
- Managed support tickets, bug tracking, and cross-functional fixes using Jira and Zoho.

PROJECTS

Solar Chat Pro: SaaS platform for the solar industry with automated customer registration, quotation management, and secure payment processing. solarchatpro.com

Bento Bits: High-performance React and Express.js monorepo portfolio showcasing full-stack projects through a modern Bento-grid interface. bentobits.in

Phonon.io Website: Built a fully responsive, mobile-first, performance-optimized website from a Figma design using React, Spring Boot, and REST APIs. phonon.io

EDUCATION

Master of Computer Applications (MCA), Pursuing | Sigma University **2025 – 2027**

Bachelor of Science (BSc), Chemistry | Shri Govind Guru University **2018 – 2021**

CERTIFICATIONS

Harvard University – CS50x: Introduction to Computer Science (Jul 2024) (Verify)

Harvard University – CS50P: Introduction to Programming with Python (May 2024) (Verify)
