PROFESSIONAL SUMMARY

Technical, client-facing professional targeting Solution Consultant and Pre-Sales Engineer roles, with 2 years of experience in SaaS product development and customer-facing application support across telecom, clean-tech, and food-delivery domains. Skilled at gathering requirements, mapping them to product capabilities, and explaining technical solutions to technical and business audiences. Experienced in resolving client issues in real time, managing tickets in Jira and Zoho, and relaying client feedback to product and engineering teams. Built Solar Chat Pro, a live SaaS platform, with first-hand experience of the product lifecycle from requirements to a demo-ready release. Background in React, Node.js, Python, REST APIs, and AWS.

CORE COMPETENCIES

Pre-Sales & Solutioning: Solution Consulting, Technical Product Demonstrations, Proof of Concept (POC), Requirement Gathering, Product Mapping, SaaS Workflows

Client & Stakeholder Management: Client Communication, RFI Handling, Ticket Management (Jira, Zoho), Customer Feedback Documentation, Cross-Functional Collaboration with Product and Engineering Teams

Technical & Process: Technical Troubleshooting, Root Cause Analysis, REST API Integration, Workflow Automation, Training and Knowledge Sharing, Market and Competitor Awareness

PROFESSIONAL EXPERIENCE

Software Engineer | Easy Caters India | Vadodara, India **May 2026 – Present**

- Translate business requirements for a food-delivery platform into technical solutions (scalable REST APIs on Express.js, MySQL).
- Deploy and maintain backend applications on AWS, supporting high availability across environments.
- Build React user interface components and integrate them with backend logic.
- Optimize database queries and indexing to improve application performance and reduce latency.

Full Stack Developer | Frelit Energy | Vadodara, India **Jun 2025 – May 2026**

- Built customer-facing web and mobile applications for the solar industry using React.js, React Native, and TypeScript.
- Designed and maintained production RESTful APIs using Express.js and MongoDB.
- Delivered responsive, mobile-first interfaces for desktop and Android using Redux Toolkit.

Application Support Engineer | Phonon.io | Vadodara, India **Oct 2024 – Jun 2025**

- Worked directly with telecom clients to resolve real-time SMS, email, and voice platform issues, maintaining 99% uptime.
- Explained technical issues and solutions clearly to client contacts across technical and non-technical roles.
- Managed support tickets, bugs, and client requests in Jira and Zoho, tracking each one from intake to resolution.
- Coordinated with product and engineering teams to prioritize fixes and relay client feedback and recurring issues.
- Reduced incident resolution time by 20% using SQL and NoSQL queries for root cause analysis and health monitoring.
- Built Python (Flask) and React monitoring tools; automated recurring backend processes with Linux shell scripts.

PROJECTS

Solar Chat Pro: SaaS platform for the solar industry with automated customer registration, quotation management, and secure payments. Designed the onboarding-to-payment customer journey. solarchatpro.com

Phonon.io Website: Built a responsive, mobile-first website from a Figma design using React, Spring Boot, and REST APIs. phonon.io

Bento Bits: React and Express.js monorepo portfolio showcasing full-stack projects. bentobits.in

TECHNICAL KNOWLEDGE

Business & Support Tools: Zoho, Jira, Figma (design handoff), Git, CI/CD

Frontend: React.js, React Native, TypeScript, Redux Toolkit (RTK), Tailwind CSS, HTML, CSS

Backend & APIs: Node.js, Express.js, Flask, Spring Boot, RESTful APIs, BullMQ, Redis

Databases & Cloud: MySQL, MongoDB, SQL, NoSQL, AWS, Linux, Shell Scripting

Programming Languages: Python, JavaScript, Java, C

EDUCATION

Master of Computer Applications (MCA), Pursuing | Sigma University **2025 – 2027**

Bachelor of Science (BSc), Chemistry | Shri Govind Guru University **2018 – 2021**
